**'igualada cemetery enric
miralles and carmel
pinos**

July 20th, 2019 - in the
work of enric miralles
the site whether natural
landscape or urban grid
is always at the
forefront of the design
in the igualada cemetery
the topographical order
is framed by angular
lines and trenches yet
the sloping concrete
embankments overhanging
parapets and converging
edges relate to the
setting as the first
perceived elements
within the overall
perspective of space'
