neuroscience of  
empathy

June 6th, 2020 -  
cultural emphasis on  
ingroups and outgroups  
may create an empathy  
gap between people of  
different races and  
nationalities says  
ying yi hong when we  
witness what happens  
to others we don't  
just activate the  
visual cortex like we  
thought some decades  
ago said christian  
keyzers of the  
netherlands institute  
for neuroscience  
in''book review marco  
iacoboni's *mirroring  
people* the

May 28th, 2020 -  
*science suggests that  
the source of our  
empathetic reactions  
is a collection of  
special brain cells  
called mirror neurons  
mirror neurons speak  
to us from the  
perspective of the  
other causing our  
brains to react as if  
we were indeed  
suffering the same  
fate as the actors on  
screen or the people  
around us''do mirror  
neurons give us*

empathy greater good  
June 6th, 2020 - i  
wonder if you could  
elaborate on the role  
of mirror neurons in  
affective experiences  
in emotional  
experiences vr well  
people have asked me  
that already and i don't  
know much about it  
all i know is they are  
involved in empathy  
for say touch or a  
gentle caress or pain  
for example pretend  
somebody pokes my left  
thumb with a needle'
