*May 22nd, 2020 - the vicious circle principle is a principle that was endorsed by many  
predicativist mathematicians in the early 20th century to prevent contradictions the principle  
states that no object or property may be introduced by a definition that depends on that  
object or property itself in addition to ruling out definitions that are explicitly circular like an  
object has property p iff it is not next to anything that has property p this principle rules out  
definitions that quantify over"***vicious circles**
