'seeing without knowing limitations of the transparency

May 14th, 2020 - models for understanding and holding systems accountable have long rested upon ideals and logics of transparency being able to see a system is sometimes equated with being able to know how it works and govern it a pattern that recurs in recent work about transparency and putational systems but can black boxes ever be opened and if so would that ever be sufficient'

'frontiers real virtuality a code of ethical conduct

June 1st, 2020 - the goal of this article is to present a first list of ethical concerns that may arise from research and personal use of virtual reality vr and related technology and to offer concrete recommendations for minimizing those risks many of the recommendations call for focused research initiatives in the first part of the article we discuss the relevant evidence from psychology that motivates"
