**'who governs energy the challenges facing global energy'**

April 19th, 2020 - the contrast with the extensive literature on global and regional governance in other issue areas is as dramatic as it is troubling 2 in the past decade virtually no publications have rigorously assessed any of the institutions of energy governance little scholarship addresses

---

how the existing institutional infrastructure pares with "**top renewable energy sources**

**thoughtco**

June 6th, 2020 - water is a renewable resource constantly recharged by the global cycle of evaporation and precipitation the heat of the sun causes water in lakes and oceans to evaporate and form clouds the water then falls back to earth as rain or snow and drains into rivers and streams that flow back to the ocean" **beyond renewables** how to reduce energy related emissions

**June 6th, 2020 - despite the uptick in renewable energy usage global emissions have steadily increased** senior fellow john woolard argues that commitments to 100 renewables while critical for sending market signals to increase investment will not alone achieve the system change needed to avoid the worst impacts of climate

---

---

**change it's time for  
panies and countries to  
mit to 100 zero carbon  
energy'**

**'energy transition to be  
shaped by world  
response to covid  
June 4th, 2020 - the  
coronavirus pandemic  
may accelerate a shift  
from fossil fuel  
spending to  
investments in  
renewable energy but  
the pace of that  
transition depends  
heavily on how  
governments direct  
economic recovery  
spending and whether  
the consumer behavior  
changes induced by the  
outbreak bee  
permanent'**

**'global governance on  
renewable energy  
springerlink'**

May 10th, 2020 - although  
the thesis explicitly  
focuses on renewable  
energy it is important to  
note that the promotion of  
renewable energy cannot  
be considered in isolation  
but must take the broader  
context of global energy  
governance into account

---

as policy actions concerning the different energy sources are closely interrelated'
