June 4th, 2020 - that in essence is a quantum field the stuff out of

which everything is made it's a boiling sea of random fluctuations on top of which you can create quantized propagating waves that we call particles. I only wish as a primarily visual thinker that the usual introduction to quantum field theory didn't look quite so much like this because behind the equations of QFT there really is a tremendous amount of imagination and a great deal of wonder'
